DATE MAILED: 07/27/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>	
	10/638,988	SUGAWARA ET AL.	
	<b>Examiner</b>	<b>Art Unit</b>	
	OLUBUSOLA ONI	2168	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 08 May 2006.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1-6 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-6 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All    b) Some \* c) None of:
  1. Certified copies of the priority documents have been received.
  2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

#### Attachment(s)

- |                                                                                                                        |                                                                             |

**DETAILED ACTION**

**Response to Amendment**

1. The amendment filed May 8, 2006 has been entered. Claims 1 – 6 are pending.  
Claims 1 and 2 have been amended.

**Claim Rejections - 35 USC § 102**

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

3. Claim1 is rejected under 35 U.S.C. 102(e) as being anticipated by David Chou (Pub. No U.S 2003/0004984) hereinafter "David".

For claim 1 David teaches data storage system having a plurality of terminal apparatuses of users connected with a data storage unit of a service provider via a computer network" (See paragraph [0020]), said data storage unit storing data from inside said terminal apparatuses so that the stored data are subsequently used by said users (See paragraph [0030]), said data storage unit comprising:

"connecting means for connecting said data storage unit of said service provider with one or more terminal apparatuses associated with each of said users via said computer network independently of types of said terminal apparatuses (See paragraph [0022], [0024-0025]);

"file storing means for allocating to each one of said users a user area of a predetermined size in which to store data from inside the respective terminal apparatus of the user in question" (See paragraph [0020]);

"file managing means for managing the data being stored in said file storing means (See paragraph [0030]); and data format converting means for performing a data format converting means process on the stored data in said file storing means" (See paragraph [0020, 0023-0024])

"wherein, in response to a use request from any one compatible with the type of the terminal apparatus used by the requesting user for connection to the system, the converted data being used by said terminal apparatus through which said requesting user has sent said use request" (See paragraph [0020-0025]).

**Claim Rejections - 35 USC § 103**

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over David Chou (Pub. No U.S 2003/0004984) hereinafter “David” in view of Deepak Puri, Mississauga (Pub No. US 2001/0037241) hereinafter “Puri”.

For claim 2, this claim is rejected on grounds corresponding to the argument give above for rejected claim 1 above. David does not explicitly teach “data disclosure controlling means to enable each user to manage the conditions under which the respective stored data in said data storing means are allowed to be used” and “wherein said data disclosure controlling means enables the data for which said use conditions have been set by each user to be used by users other than the riser-who stored the data in question into said data storing means”.

However, Puri teaches “data disclosure controlling means for managing use conditions under which said stored data in said data storing means are allowed to be used” (See paragraph [0039]) and “wherein said data disclosure controlling means enables the data for which said use conditions have been set to be used by users other than the user who stored the data in question into said data storing means” (See paragraph [0040]). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify David by teachings of Puri. Puri’s system is unique in that not all users require a user name and password to access the data storage, but entering a username and password would help identify whether or not the user is a specific type of user.

For claim 3 this claim is rejected on grounds corresponding to the argument give above for rejected claim 2 above. David does not explicitly teach “announcing means for announcing that the data for which said use conditions have been set are usable by the users other than said user who stored the data in question into said data storing means”.

However, Puri teaches “announcing means for announcing that the data for which said use conditions have been set are usable by the users other than said user who stored the data in question into said data storing means” (See paragraph [0075, 0100]).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify David with the teachings of Puri, because the announcing means works as a matching base that matches a potential buyer with a seller.

For claim 4, this claim is rejected on grounds corresponding to the argument give above for rejected claim 3 above. David does not explicitly teach “wherein said announcing means makes the announcement to a specific user other than said user who stored the data in question into said data storing means”.

However, Puri teaches “wherein said announcing means makes the announcement to a specific user other than said user who stored the data in question into said data storing means” (See paragraph [0114]).

For claim 5, this claim is rejected on grounds corresponding to the argument give above for rejected claim 3 above. David does not explicitly teach “means for establishing either in response to a request from another user before said announcement, or after said announcement”.

However, Puri teaches “means for establishing either in response to a request from another user before said announcement, or after said announcement”(See paragraph [0076])  
It would have been obvious to one of ordinary skill in the art at the time of the invention to modify David by teachings of Puri, wherein Puri’s teachings included finding a potential buyer and contacting the buyer, without the matching process.

For claim 6 this claim is rejected on grounds corresponding to the argument give above for rejected claim above. David does not explicitly teach “recording means for recording settings of said use conditions and a history of uses by the other users of the data for which said use condition have been set”.

However, Puri teaches "recording means for recording settings of said use conditions and a history of uses by the other users of the data for which said use condition have been set" (See paragraph [0039-0041]).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify David by the teachings of Puri, because obtaining a user name and password through registration would have included the need to enter varied information which becomes the users profile, likewise the history or interest of a user may be based on relevant data enter by the user.

### **Response to Arguments**

6. Applicant 's arguments filed May 8, 2006 have been fully considered but they are not persuasive. The examiner respectfully transverse applicant's argument.

For claim 1 applicant argued David does not "connecting means for connecting said data storage unit of said service provider with one or more terminal apparatuses associated with each of said users via said computer network independently of types of said terminal apparatuses" on the contrary David teaches this limitation at (See paragraph [0022], [0024-0025]). Wherein the transcoded pages do not only associate with Mobile phones or a PDA, it also supports a Palm and a PC. David also teaches a device specification database for storing the specification of a users pc or mobile

Art Unit: 2168

device, wherein when the transcoded groups are outputted to the mobile device, it will be displayed according to the users specification saved in the database.

"file storing means for allocating to each one of said users a user area of a predetermined size in which to store data from inside the respective terminal apparatus of the user in question" on the contrary David teaches this limitation at (See paragraph [0020]); wherein David teachings include a device specification database for storing the specification of a users pc or mobile device, wherein when the transcoded groups are outputted to the mobile device, it will be displayed according to the users specification saved in the database.

"wherein, in response to a use request from any one compatible with the type of the terminal apparatus used by the requesting user for connection to the system, the converted data being used by said terminal apparatus through which said requesting user has sent said use request" Wherein David teaches this limitation at (See paragraph [0020-0025]) a device specification database for storing the specification of a users pc or mobile device, wherein when the transcoded groups are outputted to the mobile device, it will be displayed to the users PC or mobile device according to the users specification saved in the database.

For claim 2 applicant argued Puri does not teach "data disclosure controlling means to enable each user to manage the conditions under which the respective stored data in said data storing means are allowed to be used" and "wherein said data disclosure controlling means enables the data for which said use conditions have been set by each

user to be used by users other than the riser-who stored the data in question into said data storing means". On the contrary, Puri teaches "data disclosure controlling means for managing use conditions under which said stored data in said data storing means are allowed to be used" (See paragraph [0039]) and "wherein said data disclosure controlling means enables the data for which said use conditions have been set to be used by users other than the user who stored the data in question into said data storing means" (See paragraph [0040]). Wherein Puri teaches most users are required to access the system by verification; i.e. (user name and password) accessing the system with their login information as required. While some users don't require a user name and password to access the system based on the kind of features they are accessing.

In light of the foregoing arguments, the 35 U.S.C 102 rejection is hereby sustained.

**CONCLUSION**

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to OLUBUSOLA ONI whose telephone number is 571-272-2738. The examiner can normally be reached on 7.30-5.00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TIM VO can be reached on 571-272-3642. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
